

*Real-time DVD-compatible MPEG-1 and
MPEG-2 encoding with authoring*

Amber

FOR DVD

Amber for DVD combines the real-time MPEG-1 and MPEG-2 encoding capabilities of Amber, with the power of Spruce DVDVirtuoso DVD-authoring software to provide a complete DVD-Video authoring solution.

Real-time MPEG encoding

The Amber hardware encodes MPEG-1 and MPEG-2 video in real-time using constant or variable bit rates. Furthermore, Amber supports MPEG Layer audio, and MP@ML IBBP MPEG-2 video, the same video format used on DVD-Video discs. With Amber, preparing your video production for DVD is fast and easy.

Powerful DVD authoring

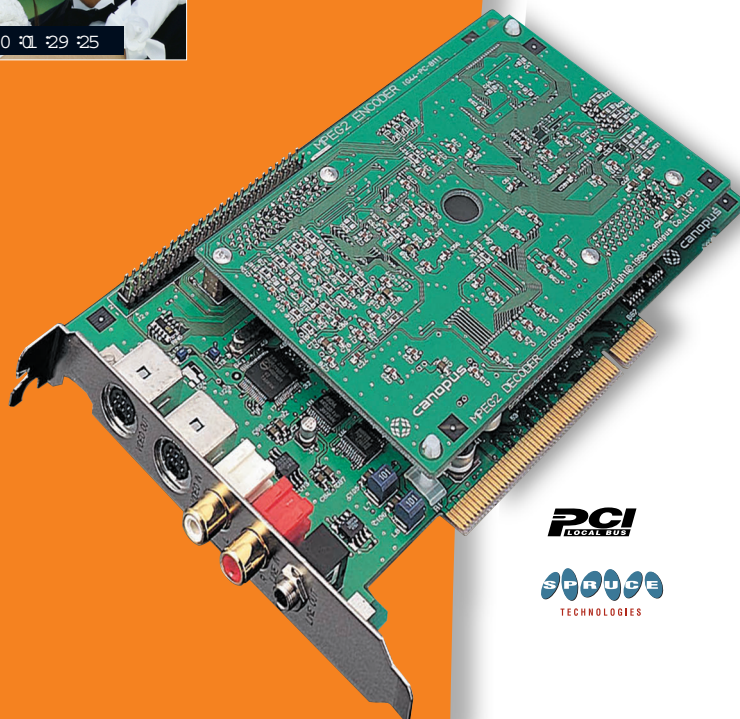

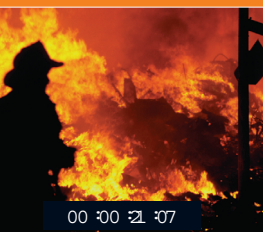

The included DVDVirtuoso software from Spruce Technologies uses the same DVD authoring engine used by many Hollywood studios. Adding menus, subtitles, and chapter points is easy with the familiar timeline layout and built-in menu and subtitle editors. DVDVirtuoso gives you everything you need to put your video on DVD.

Amber Hardware Features:

- Windows 98, NT 4.0, and 2000 compatible
- Single PCI board
- High quality MPEG-2 video and audio capture up to 15 Mb/s
- Simultaneous high quality VGA video overlay and analog video output
- MPEG-2 D1, Half-D1, and MPEG-1 real-time encoding from S and composite sources
- Near real-time conversion of Canopus DV AVI files to MPEG
- Encodes I,P,B frames (DVD-compatible MP@ML encoding)
- MPEG Layer I and II audio encoding
- S and composite video input and output
- Stereo RCA audio input, stereo mini-jack audio output
- Video and audio locked in sync during capture and playback

DVDVirtuoso Authoring Software:

- Windows NT 4.0 compatible
- NTSC and PAL support
- One video track, two audio tracks, and two subtitle tracks
- 4:3 and 16:9 aspect ratio support
- Import MPEG-1 and MPEG-2 video
- Import 48 kHz PCM 16-bit, AC-3, and MPEG-1 (Layer I and II) audio
- Import Photoshop images for menus
- Up to 99 chapter points
- Up to 10 menus
- Built-in subtitle generator
- Built-in menu editor
- Navigation Simulation and real-time preview
- Write out to DVD-R or DLT
- DVD on CD creation
- Web-linking from DVD or DVD on CD
